

WEST VILLAGE JUST GOT GREENER

West Village will be Brisbane's first 5-star Green Star community, delivering Australian excellence in environmental, social and economic sustainability.

West Village will transform the heart of the suburb with Mollison Green, a family friendly green space with children's play area, and Boundary Street Common, which recreates the historic grass forecourt of the heritage listed Peters Ice Cream factory.

These new public areas will be connected to all corners of the site by laneways for pedestrians and cyclists only, to foster a walkable, rideable and healthier neighbourhood.

WEST VILLAGE
BRISBANE

West Village will be designed for modern and sustainable inner-city living.

Smart building design means apartments will have reduced need for heating or cooling – while rainwater harvesting will be used to keep the parkland and extensive gardens lush and green.

Every apartment will have high ceilings, living and bedroom ceiling fans and large balconies from which to enjoy Brisbane's subtropical climate.

A photograph of a modern outdoor lounge area. In the foreground, there is a large, light-colored sofa with dark cushions. A man in a light-colored shirt and blue jeans is sitting on the sofa, looking towards a woman in a dark dress who is standing and talking to him. The area is filled with various potted plants, including large ferns and succulents. In the background, there are large windows with dark frames, and a vertical garden wall with green plants. The floor is made of dark tiles, and there are several modern, wire-mesh chairs and tables. The overall atmosphere is bright and airy, with natural light streaming in from the windows.

SPACES TO EXPERIEN

West Village's unmatched location close to the CBD, to education, healthcare and culture makes green and clean transportation effortless.

Getting to and from home, work or play at West Village will never be easier with the inclusion of West End's first car sharing scheme, public charging stations for electric vehicles and a state of the art bicycle commuter centre.

MORE THAN APARTMENTS

West Village residents will have the opportunity to grow their own produce with podium level community gardens, and beehives will help improve local biodiversity.
